

PAVIMENTOS 2016

FLOOR TILES

PORCELANOSA

[PAVIMENTOS 2016]

La cerámica constituye una de las mejores elecciones para el revestimiento de las paredes debido a sus óptimas prestaciones de limpieza. Tanto en los espacios privados del hogar como en las grandes superficies públicas son múltiples las posibilidades decorativas que nos brinda.

Porcelanosa ofrece un amplio catálogo de modelos cerámicos entre los que podemos encontrar desde los originales diseños en relieve hasta evocaciones a materiales naturales, como el mármol o la madera.

[FLOOR TILES 2016]

Thanks to their hard-wearing nature and the ease in they can be cleaned, tiles can provide us with one of the best options for cladding any wall. Whether it is for a private home or a large public institution, the decorative possibilities that wall tiles give are endless.

Porcelanosa offers a wide range of different models wich vary from original and evocative designs to true replications of natural materials such as marble, stone or wood.

STON-KER
Ecologic

[PRODUCTOS PARA EL DESARROLLO SOSTENIBLE]

PORCELANOSA integra los objetivos estratégicos en sus sistemas de gestión y producción de forma transversal, de manera que la implementación de procesos respetuosos con el medio ambiente no se limita a acciones puntuales, sino que forma parte de su "know-how" en su conjunto. Ir más allá de las exigencias concretas de la legislación vigente en cada momento para la reducción del impacto de la actividad industrial sobre el entorno natural es, además, una de las actitudes firmemente asentadas.

Por su parte, los procesos de diseño, fabricación, distribución y comercialización de pavimentos y revestimientos cerámicos disponen de la certificación medioambiental ISO 14001 desde 2004.

Como consecuencia, el cien por cien de los residuos procedentes de las baldosas cerámicas fabricadas que se generan en los rechazos realizados por el control de calidad se reincorpora al proceso de fabricación.

Así mismo, PORCELANOSA ha desarrollado su serie STON-KER® Ecologic cuyo contenido en material reciclado pre-consumer es superior al 95% en masa, consiguiendo así mismo, el reconocimiento al esfuerzo realizado por minimizar el impacto ambiental con el etiquetado ecológico de la Unión Europea (ECOLABEL) para las baldosas de la serie STON-KER® Ecologic (autorización nº ES-V/21/002).

Además todos los modelos fabricados por PORCELANOSA, poseen etiqueta ecológica del tipo III en forma de declaración ambiental de producto (DAPc) conforme a las normas ISO 14025 e ISO 21930.

[PRODUCTS FOR SUSTAINABLE DEVELOPMENT]

PORCELANOSA integrates the strategic objectives in their management and production systems in a transverse manner, so that the implementation of processes that are respectful towards the environment are not limited to specific actions, but instead from a part of its know-how as a whole. Going beyond the specific requirements of current legislation for reducing the impact of industrial activity on the environment is also one their most firmly rooted attitudes.

In turn, the processes involved in the design, manufacture, distribution and commercialisation of ceramic wall and floor tiles have had ISO 14001 environmental certification since 2004.

As a result, all of the residues from the manufacturing of ceramic tiles as well as elements rejected by quality control are reincorporated into the manufacturing process.

PORCELANOSA has also developed its STON-KER® Ecologic series, with a content of more than 95% pre-consumer recycled material, obtaining the European Union ecolabel for the tiles from the STON-KER® Ecologic series (authorisation nº ES-V/21/002) in recognition for the efforts made to reduce its environmental impact.

Also, all the items manufactured by PORCELANOSA, has an ecolabel of type III as environmental product declaration (DAPc) according to the standards ISO 14025 e ISO 21930.

[PAR-KER series]

PAR-KER, el parquet cerámico de PORCELANOSA es el producto más ecológico ya que contribuye a preservar nuestros bosques y contribuye a mantener el deteriorado equilibrio medioambiental en la Tierra del siglo XXI.

Soporta sin alteraciones la radiación solar, el uso, y el paso del tiempo, reinventando la belleza de la madera.

Es ignífugo y, por tanto, resiste la acción del fuego sin propagarlo. Su superficie, con posibilidad de acabado antideslizante, lo convierte además en un material óptimo para la utilización en zonas húmedas y exteriores.

Repele el agua y mantiene en su presencia tanto la estructura formal de las piezas, como el aspecto y capacidad de resistencia.

PAR-KER, the ceramic parquet by PORCELANOSA, stands out for its eco-friendly qualities, since it contributes toward the conservation of our woodlands and the restoration of the environmental balance of our 21st century planet.

Not only can it withstand solar rays, wear and tear and the passing of time, but it also evokes all the beauty of real wood.

PAR-KER is made of a fire resistant material. Available in a non-slip version, this also makes it the perfect choice for use in wet or outdoor areas.

PAR-KER repels water. Its structure, visual appeal and resistance are unaffected by moisture.

[CONCRETE series]

Sólido y resistente, el cemento ha sido desde siempre un elemento clave en la construcción, principalmente como elemento de unión. La Serie Cemento reproduce la consistencia de una superficie cementosa en piezas cerámicas de gran formato, más sencillas y cómodas de instalar, y abarcando un amplio espectro de tonalidades entre sus acabados.

Cement with its innate qualities of solidness and resistance has always been a key material of any construction. The Cement Series reproduces the appearance of a cement surface in a large format tile making installation simpler and easier. This series boasts a wide spectrum of different shades to its finishes.

[METALLIC series]

[DETROIT]	78
[GLASGOW]	80

[METALLIC series]

La Serie de pavimentos Metálicos recrea ambientes industriales y modernos, en sintonía con las tendencias urbanas, revistiendo los suelos con suaves reflejos metalizados.

Con aspecto oxidado, o reproduciendo materiales como el cobre, el acero o el bronce, los cerámicos metalizados recrean tanto el aspecto original de estos materiales, como los distintos niveles de oxidación y envejecimiento con gran fidelidad.

The Metallic Series recreates an industrial ambience which sits in perfect harmony with modern urban tendencies. The Metallic Series transforms the flooring area into a fusion of soft metallic reflections.

The tiles belonging to the Metallic Series perfectly replicate materials such as copper, steel or bronze with varied oxidized and aged appearances.

[STONE series]

La piedra es quizás el material de construcción más antiguo que se conoce, utilizado desde la era prehistórica tanto como elemento constructivo como decorativo.

Las piedras cerámicas de PORCELANOSA presentan la rica variedad que se puede hallar actualmente en las canteras: granitos, calizas, basaltos..., manteniendo las propiedades de dureza y resistencia extraordinarias de este material, con las ventajas económicas y de eliminación de humedades que ofrecen los pavimentos cerámicos.

Stone is probably the oldest-known building material. It has been used since prehistoric times for both decorative and building purposes.

The PORCELANOSA Stone Series reproduces a rich variety of the natural stone found in quarries around the world: granites, lime stones, basalts... The tiles maintain the hardness and extraordinary resistance of these materials with important economic and reduced water absorption advantages.

[MONOCOLOR series]

Los pavimentos cerámicos neutros presentan superficies y texturas originales, únicas, que no emulan ningún material preexistente en la naturaleza. Sus tonos sobrios, junto a la uniformidad cromática facilitan su integración en cualquier ambiente y la coordinación con el resto de elementos decorativos.

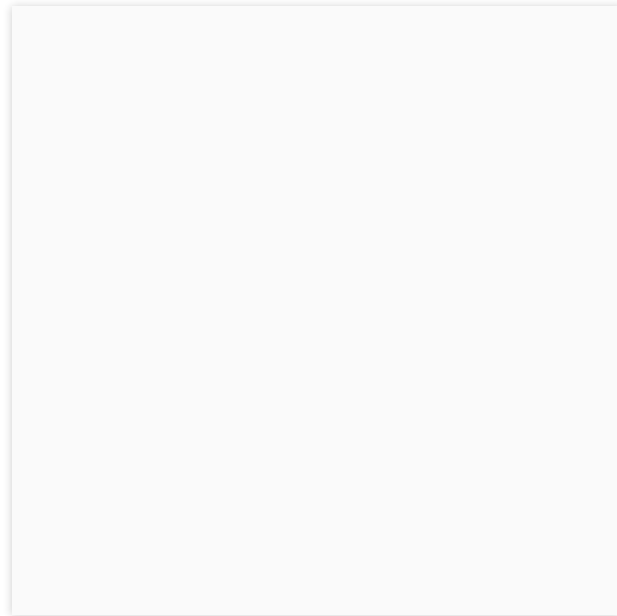

Tiles from the neutral series present original textures and surfaces that do not emulate any other material. The series' sober and uniform tones and colours facilitate their integration and coordination with all most any other decorative element.

[MARBLE series]

El mármol ha sido empleado desde la antigüedad como elemento de construcción en viviendas y edificios públicos. No en vano es una de las piedras más bellas y nobles aplicada a la construcción, capaz por sí misma de dotar de un ambiente exquisito y majestuoso a cada estancia.

No obstante, el mármol es un material que requiere de continuos cuidados para la conservación de su aspecto, y su alta porosidad provoca la fácil absorción de manchas.

Los Mármoles Cerámicos transmiten la nobleza de este material con las ventajas de la facilidad de limpieza y la nula absorción de manchas de un gres porcelánico.

Marble has long been used as a building material in private and public constructions. It is one of the most beautiful and noble of materials capable of transforming any space into a majestic area.

However, to preserve its original features marble is a material which requires continual care and maintenance. Stains often appear due to its high moisture absorption.

The Marble Series replicates the beauty of this material whilst boasting the advantages of a porcelain tile with its ease of cleaning and maintenance and near-zero moisture absorption.

DEFINICIÓN DE ICONOS

ICON DEFINITION

Estos símbolos han sido creados para que se pueda interpretar de forma rápida el tipo de producto que se está visualizando. *These symbols have been created so that the type of product that is being observed can be quickly classified.*

MATE _ MATT

Acabado superficial de aspecto natural, no brillante.

Natural, not shiny surface finish.

BRILLO _ GLOSS

Acabado superficial brillante con un alto grado de reflexión de la luz.

Shiny surface finish with a high degree of light reflection.

LUSTRE BRILLO _ GLOSS LUSTER

Aplicación superficial que dota de alto brillo a una parte o a la totalidad de la decoración de la baldosa, con el fin de remarcar zonas de relieve, dibujos o formas del diseño de la pieza.

An application applied to the surface which either brings out part or all of the high gloss in the decoration so that the relief, the pattern or the design of the tile is highlighted.

LUSTRE _ LUSTER

Aplicación superficial que dota de brillo a una parte o a la totalidad de la decoración de la baldosa, con el fin de remarcar zonas de relieve, dibujos o formas del diseño de la pieza.

An application applied to the surface which either brings out part or all of the gloss in the decoration so that the relief, the pattern or the design of the tile is highlighted.

LAPADO _ LAPPATO

Las baldosas son pulimentadas mecánicamente de forma heterogénea, creando un efecto de mate-brillo muy natural, similar al que se produce en las superficies que tienen un uso continuado en el tiempo.

The tiles are polished mechanically and unevenly, creating a very natural matt-gloss effect, similar to that seen on surfaces that have become worn over time.

RELIEVE _ RELIEF

Acabado con resaltes importantes claramente definidos y que aportan sensación de volumen a la superficie.

Finish with high and clearly defined ridges, providing volume to the surface.

TEXTURADO _ TEXTURED FINISH

Superficie con pequeños resaltes que proporcionan un acabado con relieve suave.

Surface with small protrusions that provide a smooth relief finish.

RECTIFICADO _ RECTIFIED

Nombre que recibe el acabado de aquellas baldosas mejoradas dimensionalmente tras el proceso de cocción. El mecanizado al que se las somete realiza igualmente la calidad estética del ambiente formado.

Name given to the finish of tiles dimensionally improved after firing. The process enhances the aesthetic quality of the setting created.

GRANILLA TÉCNICA _
TEXTURE GRAIN

Aplicación superficial previa de granillas específicas para la serie Stonker, aplicadas con anterioridad a la cocción y que genera una superficie antideslizante con buena resistencia al desgaste.

Surface application of grits specific for the Stonker range, applied before firing which generates a slip resistant surface with good wear.

GTex GRANILLA TEXTURE _
TEXTURE GRAIN

Aplicación superficial de granillas y cubiertas previa a la cocción para aportar ligera textura al acabado original, pero con prestaciones de seguridad inferiores al acabado antislip.

Surface application of grits before the firing process which provides a smooth texture to the original finish, with lower security performance than the antislip finish.

ANTISLIP

Textura superficial que minimiza el riesgo al deslizamiento. Acabados suaves que aportan seguridad al caminar.

Surface texture which minimises the risk of slippage. Smooth finishes that guarantee safe steps.

NANO-KER
HIGH PERFORMANCE CERAMIC TECHNOLOGY

Aplicación superficial de nanomateriales previa a la cocción y que aporta un acabado antideslizante de textura agradable al tacto.

Nanomaterials surface application before firing which provides an antislip finish yet smooth texture.

STON-KER®

Colección de porcelánicos con apariencia de piedra natural, de soporte coloreado y similar en aspecto a la decoración superficial. Con las mejores prestaciones técnicas y encaminados a revestir con garantías las zonas más exigentes.

Collection of porcelain tiles with natural stone appearance, with a coloured body which is similar to the surface decoration. The best technical performance for covering with total guarantee the most demanding areas.

DIRECCIONALIDAD _
DIRECTIONALITY

Observar la parte trasera de las piezas para su correcta colocación. Colocar las piezas de forma que las flechas apunten siempre hacia arriba.

Please have a look the at the back side of the tile for a proper installation. Arrows should point. Up when fixing the tiles.

DESTONIFICADO _ TONE VARIATIONS

Las series identificadas con este símbolo presentan un diseño general destonificado que puede requerir la conformación de paneles lo suficientemente representativos en número de piezas, como para poder apreciar el grado de variación tonal y de aspecto.

Series marked with this symbol have a high degree of shade variation. As a result, a board with a tiled surface might be needed to reflect their true appearance and shade variation once laid.

Escala de destonificación del color:

V1 Aspecto uniforme. Todas las piezas de una misma partida son similares.

V2 Ligera variación. Diferencias claramente perceptibles en textura y/o diseño pero con colores similares.

V3 Variación moderada. La intensidad de color de cada pieza puede variar significativamente, aunque los colores presentes en una baldosa serán representativos de los colores que cabe esperar en el resto de baldosas.

V4 Aleatoria variación. Diferencias de color aleatorias entre unas baldosas y otras, de manera que cada una de ellas puede tener colores completamente distintos de los demás. De este modo, la colocación final será única.

Tone variation of colour:

V1 Uniform appearance. All the pieces from the same production run are similar.

V2 Slight variation. Clearly distinguishable differences in texture and/or pattern with similar colors.

V3 Moderate variation. While the colors present on a single piece of tile will be indicative of the colors to be expected on other tiles, the amount of color on each piece will vary significantly.

V4 Substantial variation. Random color differences from tile to tile, so that one tile may have totally different colors from that on other tiles. Thus, the final installation will be unique.

RESISTENCIA AL DESLIZAMIENTO

SLIP RESISTANCE

Muchos fabricantes europeos de suelos, usan ensayos del tipo de la rampa para clasificar sus productos en función del grado de deslizamiento. Estos ensayos se llevan a cabo generalmente, usando la norma alemana DIN 51130.

El método implica el uso de sujetos que caminan adelante y atrás a través de un suelo impregnado y utilizado como banco de ensayos en forma de rampa. El grado de inclinación de la rampa se va incrementando gradualmente hasta que el sujeto que está ensayando, resbala. El ángulo medio de inclinación al que el sujeto resbala, es utilizado para calcular el ángulo crítico de deslizamiento.

La norma DIN 51130 utiliza unas botas de seguridad según norma EN 345 y aceite de motor como sustancia que impregne la superficie a ensayar.

Many European flooring manufacturers use tests like the ramp test to rate their products according to their slip resistance. These tests are generally conducted using the German standard, DIN 51130.

With this method, a person walks backwards and forwards on an impregnated ramp-type floor used as a test bench. The angle of the ramp is gradually increased until the person slips. The average angle at which the person slips, is used to calculate the critical angle of slip.

DIN 51130 uses approved safety boots according to standard EN 345 and engine oil to impregnate the test surface.

CTE CÓDIGO TÉCNICO FDE LA EDIFICACIÓN

SPANISH BUILDING CODE

El CTE, Código Técnico de la Edificación, dentro de su Documento Básico de seguridad de Utilización 1 "DB SU 1 - seguridad frente al riesgo de caídas", define los requisitos que debe cumplir un suelo para poder ser utilizado como pavimento de los edificios o zonas de uso sanitario, docente, comercial, administrativo, aparcamiento y pública concurrencia (excluidas las zonas de uso restringido). Para ello, el pavimento deberá cumplir con un valor mínimo al deslizamiento "R_d".

El valor de resistencia al deslizamiento "R_d", se determina mediante el ensayo del péndulo descrito en el Anexo A de la norma UNE-ENV 12633: 2003.

La siguiente tabla establece la clasificación de los suelos según su resbaladidad:

Safety of Use" Basic Document 1 ("DB SU 1 - Preventing Falls") of the Spanish Building Code (the CTE in Spanish) defines the requirements that a floor covering must meet in buildings or areas used for health-related, educational, commercial, administrative or public purposes or for parking (excluding areas of restricted use). To comply, the flooring must achieve a minimum slip resistance (R_d) value.

The slip resistance (R_d) value is determined using the pendulum test described in Appendix A of standard UNE-ENV 12633: 2003.

The following table shows the rating system for flooring, depending on its slip resistance:

Valor total medio del ángulo de caída Total mean value of slip angle	Clasificación Rating
6° ≤ Ángulo · Angle ≤ 10°	R9
10° < Ángulo · Angle ≤ 19°	R10
19° < Ángulo · Angle ≤ 27°	R11
27° < Ángulo · Angle ≤ 35°	R12
35° ≤ Ángulo · Angle	R13

Resistencia al deslizamiento R _d Slip resistance R _d	Clase Rating
R _d ≤ 15	SRV CLASS 0
15 < R _d ≤ 15	SRV CLASS 1
35 < R _d ≤ 45	SRV CLASS 2
R _d > 45	SRV CLASS 3
